

CI.1 N Smith St Corridor Improvements

PROJECT DESCRIPTION

N Smith St is a wide neighborhood street that experiences high volumes of traffic with speeds exceeding the posted speed limit. This project would explore a variety of traffic calming methods to reduce speeds and encourage longer-distance trips to use N Fessenden St.

This project would also improve and enhance existing pedestrian crossings, add more frequent safer places to cross the street, and explore options to improve the existing buffered bike lanes. Additional project elements could include increasing tree canopy, street lighting, and other streetscape improvements.

PROJECT ELEMENTS

SAFER SPEEDS

BETTER CROSSINGS

BETTER BIKE ROUTES

ESTIMATED PROJECT COSTS:
