

# CI.11

## N Argyle Way Corridor Improvements

### PROJECT DESCRIPTION

N Argyle Way is a busy street with high volumes of traffic coming off and on of N Columbia Blvd. Over the past decade, this street has seen a large amount of affordable and supportive housing built, yet the design of the street has not changed to reflect the increase in pedestrian activity.

This project would utilize tools to reduce traffic speeds and add new pedestrian crossings near Kenton Park. It would also explore options for making a better biking connection between the N Columbia Blvd trail and the commercial area on N Denver Ave.

### PROJECT ELEMENTS

**SAFER SPEEDS**

**BETTER CROSSINGS**

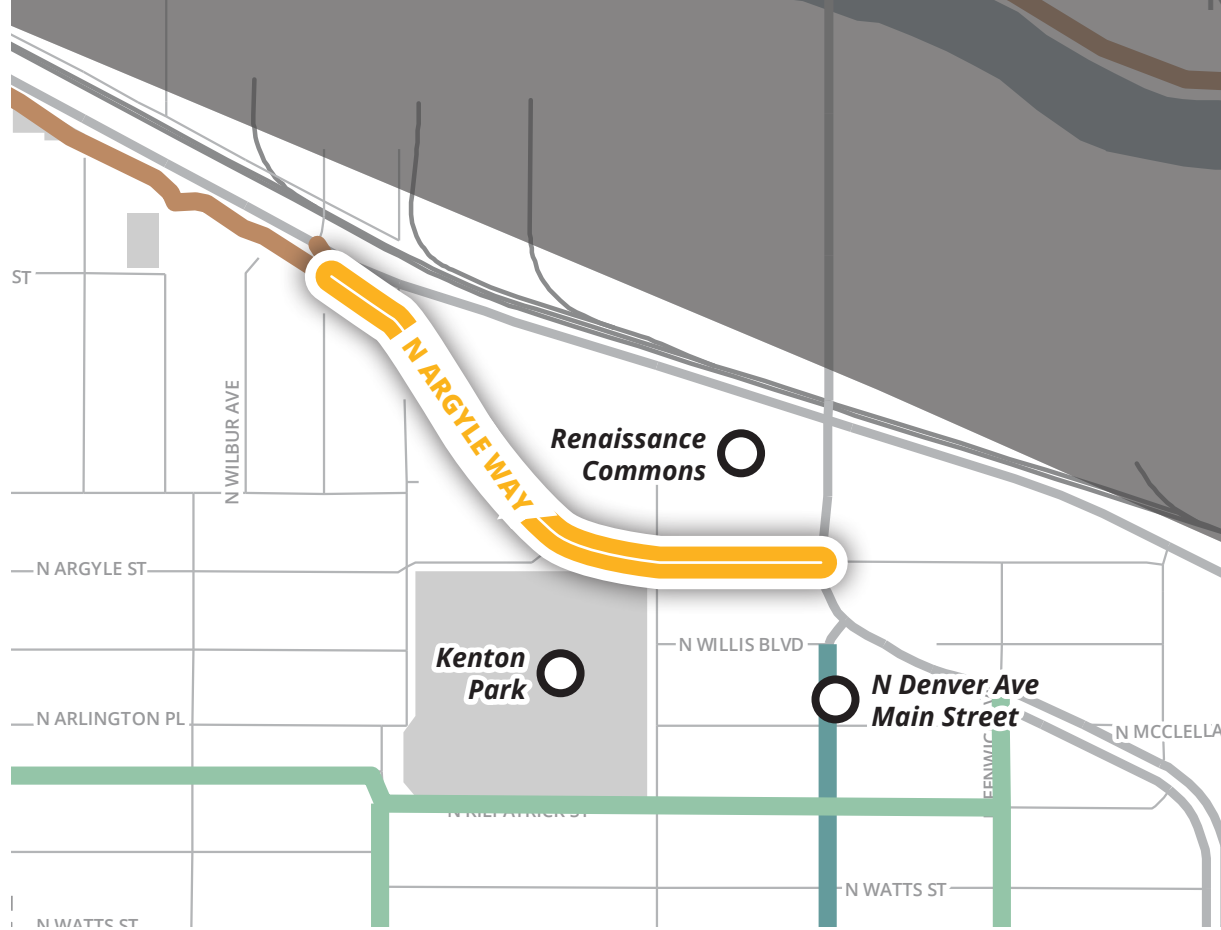

**BETTER BIKE ROUTES**

### ESTIMATED PROJECT COSTS:
