

CI.12

N Greeley Ave Corridor Improvements

PROJECT DESCRIPTION

N Greeley Ave is among the busiest streets in North Portland, serving both transit and large volumes of vehicles accessing Interstate 5. With increased residential development and a growing small business community, it is quickly becoming a more active street with high levels of pedestrian activity.

This project would improve existing crossings and explore ways to add new crossings to meet PBOT guidelines. It would also explore ways to improve the existing Rose Lanes Transit Priority treatments to increase the speed and reliability of Line 35. Additionally, this project would explore a range of options to reduce high-end speeding along this corridor.

PROJECT ELEMENTS

SAFER SPEEDS

BETTER CROSSINGS

TRANSIT IMPROVEMENTS

ESTIMATED PROJECT COSTS:
