

CI.13

N Denver Ave Corridor Improvements

PROJECT DESCRIPTION

N Denver Ave is a busier local street linking the Overlook, Arbor Lodge, and Kenton neighborhoods. This popular route serves several commercial areas including businesses on N Killingsworth St, a commercial node at N Rosa Parks Way, and Downtown Kenton on the north end.

This project would improve existing crossings along the corridor and make safety improvements to reduce conflicts at major intersections between vehicles and people biking. This project would also utilize a range of traffic calming techniques to reduce overall vehicle speeds. Additionally, the project would explore options for improving the existing narrow striped bike lanes to add additional buffered space between vehicle travel lanes and bike lanes.

PROJECT ELEMENTS

**BETTER
CROSSINGS**

**BETTER BIKE
ROUTES**

**SAFER
SPEEDS**

ESTIMATED PROJECT COSTS:
