## N Killingsworth St Corridor Improvements

### PROJECT DESCRIPTION

N Killingsworth St in the Overlook neighborhood is home to a growing small business community and is increasingly a place where new, higher-density mixed use development is happening.

In the near-term, this project would improve existing pedestrian crossings and add new crossings to make it easier to cross the street. Upon implementation of this project, the North Portland in Motion team would partner with TriMet to improve bus stops served by the frequent-service Line 72.

In the long-term, PBOT recommends a major reconstruction of the street improve the street surface and structural integrity of the street by removing the historic rail tracks buried under the asphalt. Alongside that future project, North Portland in Motion recommends that a major pedestrian-centered streetscape plan be developed and implemented.

### PROJECT ELEMENTS

**SAFER SPEEDS**

**BETTER CROSSINGS**

**TRANSIT IMPROVEMENTS**
