

CI.2 N Ida Ave Corridor Improvements

PROJECT DESCRIPTION

N Ida Ave is a busier corridor that serves a number of major community destinations in St Johns including Fred Meyer and Roosevelt High School. Today the street has missing sidewalks, long distances between crossings, and narrow striped bike lanes.

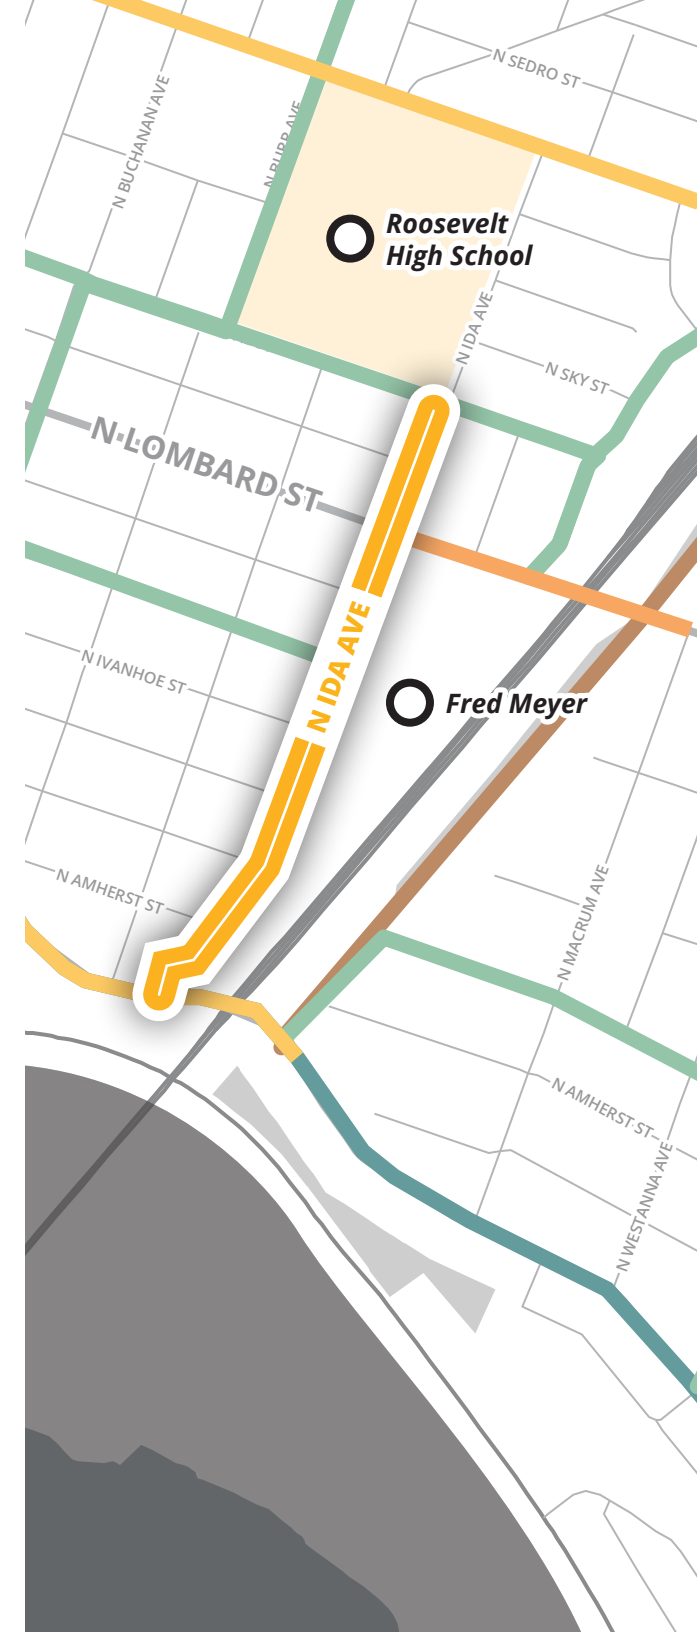

This project would fill in missing sidewalks and add more frequent pedestrian crossings to provide safer access for people walking. The project would also widen and improve the existing bike lanes to create a better connection between the existing bike lanes on N Willamette Blvd and the N Central Neighborhood Greenway. Additional project elements could include increasing tree canopy, street lighting, and other streetscape improvements.
