

CI.4 Cathedral Park Access Improvements

PROJECT DESCRIPTION

Cathedral Park is a fast-growing area of the Upper Peninsula and is expected to continue to grow over the coming years with larger-scale mixed-use developments and commercial activity. This collection of projects would invest in basic safety investments to improve access for people walking and biking between the waterfront area of Cathedral Park and Downtown St Johns. These improvements would help provide the foundational access and circulation improvements for future potential transit services.

Near-term improvements could include: street paving; sidewalk repair and infill; increasing tree canopy, and adding bike lanes for people traveling up the steep hill.

Cathedral Park

PROJECT ELEMENTS

-  **BETTER BIKE ROUTES**
-  **BETTER CROSSINGS & SIDEWALKS**

ESTIMATED PROJECT COSTS:
