## CI.6 N Wall Ave Corridor Improvements

## **PROJECT DESCRIPTION**

N Wall Ave is a wide, busy local street that connects N Fessenden St and N Lombard St. It is a useful North/South route connecting the Portsmouth and University Park neighborhoods. South of N Lombard St, this project would connect with the recently-funded N Wall Neighborhood Greenway providing a connection to existing bike lanes on N Willamette Blvd.

This project would improve the recently installed bike lanes on N Wall Ave by narrowing the travel lanes and striping in buffered bike lanes. It would also improve the interim crossing where N Wall Ave intersects with the N Houghton Neighborhood Greenway. Additional project elements include safety improvements at the intersections of N Lombard St and N Fessenden St.
