## N Willis Blvd Corridor Improvements

### PROJECT DESCRIPTION

N Willis Blvd is a major East/West corridor connecting the Portsmouth and Kenton neighborhoods on the northern end of the peninsula. It is a wide street with a uniquely large furnishing zone with ample space for greenery and street trees.

This project would fill in the remaining sidewalks gaps, improve ADA access, improve existing crossings, and add additional safe pedestrian crossings. This corridor serves both TriMet Line 4 and Line 35 buses and PBOT will work with TriMet on bus stop improvements at higher ridership locations. This project will explore a range of design options to improve the safety and comfort of people riding bikes including adding new bike lanes.

### PROJECT ELEMENTS

**BETTER BIKE ROUTES**

**BETTER CROSSINGS & SIDEWALKS**

**SAFER SPEEDS**

**TRANSIT IMPROVEMENTS**
